**YOUR SOLUTION**

Building success.

# The hotspot for solid wood and timber construction.

Sustainable living spaces are one of the megatrends of our time. With **SYSTEM TM**, **KALLESOE** and **WEINMANN** you become part of the success story. Experience the solutions in Hall 14 – the hotspot for optimized timber, engineered wood, timber construction, and more.

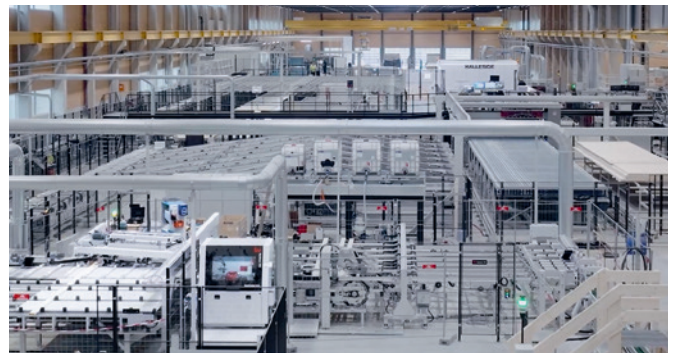

## Building capacity.

**SYSTEM TM** is the first point of interest for the solid wood industry.

- The cross-cut saw technology for maximum added value

**KALLESOE** is the specialist for complete solutions for the production of solid wood products.

- The most efficient high-frequency generator for gluing of engineered wood.

## Building productivity.

**WEINMANN** offers carpenters, module manufacturers and the prefabricated building industry everything the timber construction heart desires - from A to Z.

- Optimized entry-level solution for the multifunction bridge
- Highly automated robotics solution for the industry

## Building connections.

The shortage of skilled workers, importance of resource efficiency and automated processes are key market challenges. We have answers - in a personal exchange, from expert to expert. We look forward to your visit.
